

*In. bijou/Jewelry design*

*The jewelry is an expression on our body of our being.*

*Georg Simmel described in 1908 as follows: "The splendor of the adornment, the sensual attractiveness it provides, produces an extension of the personality or an intensification of its sphere."*

*I am a designer who works with different handcrafts: silversmithing, knitting, and embroidery.*

*My designs are inspired by natural structures built with metal filament, results of doing, experiment, observation and selection.*
